Between 1330 and 1600 hours on 31 January, five jet aircraft with a fuselage step were once more observed at Jocksdorf airfield. A twin-jet aircraft was parked near the five planes. There was no air activity and very little vehicular traffic. Only Soviet Air Force soldiers were observed in the vicinity of the airfield. A great number of Soviet Air Force and VdA ( East German Air Force ) personnel were observed in the neighboring town of Forst.

Comment. Aircraft with fuselage steps had first been observed at Jocksdorf on 29 December 1954. A detailed description of the twin-jet aircraft observed on 31 January definitely identifies it as an IL-28. It is assumed that VdA personnel as well as Soviet Air Force troops are stationed at Jocksdorf even though none of the former were observed in the vicinity of the airfield.
